Living Donor Blood Pressure Algorithm

**Contraindications**
- Hypertension
- Uncontrolled with a single Rx
- End organ damage (LVH, retinopathy, albuminuria)
- Age < 50
- Minority populations
- With other ASCCD risk factors: Hyperlipidemia, Tobacco, Obesity, FHx+

**SBP 120-139 DBP 80-89**
- Frequent SBP > 139 DBP > 89
  - Exclude

**24° ABPM**
- SBP > 129, DBP > 84 or Nocturnal dip <10%
  - Exclude

**SBP < 120 DBP < 80 + nocturnal dip**
- Do not exclude

**SBP (mean) 120-129 DBP 80-84 + nocturnal dip**
- Additional risk factors such as multiple 1° family members with HTN or borderline BMI
  - Exclude

- No other risk factors
  - Do not exclude, but counsel about possible increased risk of HTN and modifiable risk factors
