 PHYSICAL ACTIVITY BREAKS

let’s take a break!

Use them throughout the day as a quick and easy physical activity break.
• Put a few together for an indoor activity.
• Combine them all for use at a health fair or field day.

There are several ways to incorporate these ideas into the day. You could:

The following activity breaks come from Kerry Cartwright, first grade teacher at Young Elementary School in Saco. They are great for all ages.

**High Knee Run/March:** Run or march in place, lifting your knees in front of you as high as you can.

**Hula Hoop:** Around your waist. Do the best you can and have fun! Keep moving your hips! Hula hoop twirling builds abdominal strength. Twirling two hula hoops (one on each arm) builds hand-eye coordination.

**Tree Pose:** Balance on one foot. Place your other foot on the inside of your balanced leg. Your knee should be pointing to the side and your heel pointing up your leg. It is okay to leave your toes on the ground if you need to. Bring your hands together in front of you or overhead. Change legs after a count of 30.

**Wood Chopper:** Stand with your feet hip distance apart. Squat down with arms extended in front of you with a ball between your hands or just bring your hands together in a fist. As you lower in a squat bring the ball towards the ground. As you rise up, bring the ball over your head. Keep your eyes looking straight ahead the entire time.

**Chair Pose:** Feet together. Legs together. Keeping your knees together, sit back like you are sitting in a chair. Hold that position as long as you can. Relax when you need to, and then try again.

**Skate in Place:** Pretend to ice skate in place as you hop side to side, bringing your heel behind you as high as you can. Swing your arms side to side. You can do this without hopping by stepping side to side.

**Agility Ladder:** Place a ladder on the ground. Run through the ladder without stepping on the bars. Pick your knees up high! Run through the ladder and then jog around to the other end to do it again.

**Squeeze the Ball:** Place a ball between your hands, elbows pointing out to the side. Squeeze your palms in towards the ball. Feel your arms working hard!

**Jump Rope:** You can pretend to jump rope or use a real jump rope. Keep moving! Jumping rope builds endurance and is recommended for both children and adults. It can be done individually or in a group setting.

**Hands to Knee:** Extend your arms overhead. Lock your thumbs together. Lift one knee up as you pull your arms down to touch that knee. Arms go back overhead as that foot goes back down to the ground. Lift the other knee as you pull your arms down to touch the knee. Stand nice and tall to help your abdominal muscles get strong!
