By choosing nutrient-dense foods like these, you can make sure your child’s calories count

- Vibrant, deeply-colored fruits and vegetables
- Lean meat, skinless poultry, fish, eggs, beans, and nuts

**TIP:** The leanest cuts of meat end in “loin” or “round”

- Fiber-rich whole grain foods
- Milk, cheese, and yogurt

**Tips to help your family have a healthier diet**

Are you looking to help everyone in your family eat healthier? Here are some ideas for how to successfully introduce new foods and improve the quality of your family’s diet.

- Offer new foods over and over again. It can take many exposures to a food before a child is willing to try it.
- Offer less familiar foods alongside your child’s favorite foods to increase the chances they’ll try it.
- Mix more nutritious foods into less nutritious ones. For example, mix whole grain cereal into your child’s favorite cereal, plain yogurt into sugar-sweetened yogurt, and whole grain flour into your pancake mix.
- Make your own versions of favorite foods (e.g. pizza with whole wheat dough and veggies on top, baked ‘French fries’ tossed in olive oil and salt).
- Let the kids help you cook! They are more likely to try something they helped make.
- Have fresh veggies available for kids to snack on while they wait for dinner to be ready.
- Be prepared with healthy on-the-go options: whole or dried fruit, nuts, hard boiled eggs, cheese sticks, yogurt cups, and single-serve fruit cups canned in water or 100% fruit juice are all good options.
