QUICK BRAIN BOOSTS

Try the ideas below for quick brain boosts in between learning activities in the classroom.

High Knee Run/March: Run or march in place, lifting your knees in front of you as high as you can.

Tree Pose: Balance on one foot. Place your other foot on the inside of your balanced leg. Your knee should be pointing to the side and your heel pointing up your leg. It is okay to leave your toes on the ground if you need to. Bring your hands together in front of you or overhead. Change legs after a count of 30.

Wood Chopper: Stand with your feet hip distance apart. Squat down with arms extended in front of you with a ball between your hands or just bring your hands together in a fist. As you lower in a squat bring the ball towards the ground. As you rise up, bring the ball over your head. Keep your eyes looking straight ahead the entire time.

Chair Pose: Feet together. Legs together. Keeping your knees together, sit back like you are sitting in a chair. Hold that position as long as you can. Relax when you need to, and then try again.

Skate in Place: Pretend to ice skate in place as you hop side to side, bringing your heel behind you as high as you can. Swing your arms side to side. You can do this without hopping by stepping side to side.

Agility Ladder: Place a ladder on the ground. Run through the ladder without stepping on the bars. Pick your knees up high! Run through the ladder and then jog around to the other end to do it again.

Squeeze the Ball: Place a ball between your hands, elbows pointing out to the side. Squeeze your palms in towards the ball. Feel your arms working hard!

Jump Rope: You can pretend to jump rope or use a real jump rope. Keep moving! Jumping rope builds endurance and is recommended for both children and adults. It can be done individually or in a group setting.

Hands to Knee: Extend your arms overhead. Lock your thumbs together. Lift one knee up as you pull your arms down to touch that knee. Arms go back overhead as that foot goes back down to the ground. Lift the other knee as you pull your arms down to touch the knee. Stand nice and tall to help your abdominal muscles get strong!
