Set limits!
- Juice products labeled “-ade,” “drink,” or “punch” often contain 5% juice or less. Sometimes, the only difference between these “juices” and soda is that they have added Vitamin C.
- Always try to choose whole fruits over juice.
- Have a glass of water or milk instead of juice.
- If you choose to have juice:
  - Buy 100% juice.
  - Drink no more than 8-12 ounces per day.

Heep it handy and cold!
- Keep bottled water or a water bottle on hand.
- Fill a pitcher of water and keep it in the fridge.

Liven It Up, Make It Fruity:
- Add fresh lemon, lime, or orange wedges to water for some natural flavor.
- Try mixing seltzer with a splash of juice.

Be a Role Model for Others:
- Drink water when you’re thirsty.
- Replace soda with water, instead of other sugar-sweetened beverages, such as juice or sports drinks.

Water is fuel for your body:
- Between 70-80% of our body is made up of water.
- When you exercise, you sweat, and when you sweat, you LOSE water—it is important to replace the water you lose when you sweat.
- Water is the #1 thirst quencher!
