

Maine Behavioral Healthcare  
MaineHealth

Dear Parent/Guardian,

Welcome to the Center for Autism and Developmental Disorders outpatient clinic. We provide a coordinated, multi-disciplinary treatment for children and adolescents who have been diagnosed with autism and/or intellectual disability, and are having behavioral or mental health challenges. We offer child psychiatry, behavioral therapy (ABA), case management, individual and family therapy, and social skills groups, all under one roof. Our expert staff have years of experience working with the ASD/ID population and are eager to share their expertise with you.

Enclosed is the patient information questionnaire. Please complete the packet to the best of your ability and return it to us by mail, fax, email, or in person. Please include the most recent psychological testing resulting in a diagnosis of autism spectrum disorder or intellectual disability with the completed packet. Please note that if your child is an adult with guardian or child with shared guardianship we also ask you to include a copy of the guardianship document.

Upon receipt of your completed packet, one of our clinicians will review the information to ensure your child's needs can be met here at CADD, and a staff person will contact you to schedule an initial appointment.

Please note that at this time, outpatient ABA services are not covered by MaineCare.

If you have any questions, please do not hesitate to contact us at (207) 661-6725 so that we may assist you.

Sincerely,

The CADD Team
