Living Donor Blood Pressure Algorithm

SBP 120-139
DBP 80-89

24h ABPM

SBP <120
DBP < 80
+ nocturnal dip

Do not exclude

Frequent
SBP > 139
DBP > 89

Exclude

SBP > 129,
DBP > 84
or
Nocturnal dip <10%

Exclude

SBP (mean) 120-129
DBP 80-84
+ nocturnal dip

Additional risk factors
such as multiple
1° family members
with HTN or
borderline BMI

Exclude

No other risk factors

Do not exclude,
but counsel about
possible increased
risk of HTN and
modifiable risk factors

Contraindications
Hypertension
Uncontrolled with a single Rx
End organ damage (LVH,
retinopathy, albuminuria)
Age<50
Minority populations
With other ASCCD risk factors:
Hyperlipidemia
Tobacco
Obesity
FHx+
