In Support of LD 1228
“Resolve, Requiring the Department of Health and Human Services to Create a Limited Benefit MaineCare Card for Individuals Eligible for the Medicare Savings Program”
Friday, May 3, 2019

Senator Gratwick, Representative Hymanson, and distinguished members of the Joint Standing Committee on Health and Human Services, I am Annette Fournier, Case Manager for the MaineHealth Access to Care Coverage Team, and I am here to testify in support of LD 1228, “Resolve, Requiring the Department of Health and Human Services to Create a Limited Benefit MaineCare Card for Individuals Eligible for the Medicare Savings Program.”

MaineHealth is Maine’s largest integrated non-profit health care system that provides the full continuum of health care services to the residents of eleven counties in Maine and one in New Hampshire. As part of our mission of “Working Together So Maine’s Communities are the Healthiest in America,” MaineHealth is committed to caring for all patients, regardless of their ability to pay. Our MaineHealth Access to Care Coverage Team assists Maine’s uninsured and underinsured individuals with the process of applying for various MaineCare and Affordable Care Act programs. We also assist patients with underutilized MaineCare benefits, including the Medicare Savings Program.

The Medicare Savings Program, also known as the “Medicare Buy-In Program,” is a limited benefit MaineCare program available to low-income elderly and disabled individuals who are insured by Medicare. In addition to being a Medicare beneficiary, applicants must have an income below $22,764 per year for a family of one to be eligible for the program. The Medicare Savings Program can help pay for Medicare co-pays, coinsurances, deductibles, and premiums. For example, the program pays for the Medicare Part B premium, saving a person $136 each month. In addition, once deemed eligible for the Medicare Savings Program, a person is automatically enrolled for the Federal Low-Income Subsidy (LIS) which greatly reduces the cost of prescription medications.

Currently, Medicare Savings Program beneficiaries receive only a letter from the Department of Health and Human Services once approved for the program. This single letter must be kept and shown prior to all medical services and each time the individual goes to the pharmacy for medications.

MaineHealth’s Access to Care Team began assisting individuals with Medicare Savings Program enrollment in June, 2017. Since then, we have helped 230 Mainers apply for the program. During this time – and in my past experiences – it has become apparent that these beneficiaries are at a disadvantage when it comes
to understanding what their coverage entails. For many, it is their first time ever receiving benefits from the State, and the letter does not equate to having health insurance coverage. Others simply do not understand the eligibility letter. We believe that providing Medicare Savings Program beneficiaries with a Medicare Savings Program card – similar to an individual’s Medicare card – would greatly improve access to medical care and prescription medications.

The Medicare Savings Program is an important and vital supplement to a person’s Medicare coverage and deserves to be treated as insurance coverage. Providing a Medicare Saving Program identification card is a simple and easy way to inform individuals of their existing coverage, and serves to limit confusion between patients and their healthcare providers.

For these reasons, I urge the Committee to vote Ought to Pass on LD 1228, “Resolve, Requiring the Department of Health and Human Services to Create a Limited Benefit MaineCare Card for Individuals Eligible for the Medicare Savings Program.” Thank you and I would be happy to answer any questions you may have.
